

# QuickStream DV/HDV

**COMING SOON**  
**First Ever Solid-State**  
**Portable Video**  
**Capture Device!**  
**Low Power!**  
**100% Silent!**  
**Ultra-rugged!**

## Shoot, then edit!

The all-new MCE QuickStream DV/HDV re-engineers the digital video professional's workflow and completely eliminates the time-consuming and inefficient process of capturing DV or HDV footage from tape to your Mac or Windows non-linear editing (NLE) system.

At about the size of a stack of 3 x 5 cards and weighing only 10.5 ounces, the MCE QuickStream DV/HDV is the smallest and most durable portable FireWire DV and HDV capture hard drive available. The new QuickStream DV/HDV captures high quality HDV footage, in addition to standard DV footage, on-the-fly via your camera's FireWire port, in your choice of file-format (.MOV, .AVI2, .DV, or .M2T for HDV) while you are shooting. Its versatile top- and bottom-mounted 1/4-20" interface sockets allow you to situate the QuickStream DV/HDV above or below your camcorder – whatever is most convenient for you. When done shooting your footage, simply disconnect the QuickStream DV/HDV from your DV or HDV camcorder's FireWire (1394, i.Link) port and plug it into your NLE system's FireWire connector and begin editing your footage IMMEDIATELY!

## Features

- Digitally Capture DV or HDV footage
- All New Ruggedly Redesigned Enclosure
- Top AND Bottom 1/4-20" Screw-Hole Mounts
- Instantly Review Footage on Your Camcorder
- SureCapture Pre-Roll Technology
- Battery Level Indicator
- Universal Mac and PC Compatibility
- Absolutely No Dropped Frames
- Selectable File Formats
- DV/HDV Recorder and Self-Powered FireWire Hard Drive
- Shoot Alongside Tape - Or Not
- Lithium-Ion Powered Internal Battery

# QuickStream DV/HDV

## Save Time, Save Money!

When connected to an HDV camcorder, the new MCE QuickStream DV/HDV automatically detects the HDV stream from the HDV camcorder's FireWire port and instantly saves it to its high performance hard drive as a standard .m2t HDV file. No operator intervention is required. Once shooting is done, simply connect the new QuickStream DV/HDV to your computer and drop the .m2t clips directly into your favorite HDV editing application. You will be editing immediately without the time-consuming process of transferring from tape to computer and without tying up your HDV camcorder. If you are currently shooting with a DV-only camcorder, your investment in the new QuickStream DV/HDV is retained if you eventually upgrade to an HDV camcorder... the new QuickStream DV/HDV will transition right along with you!

The Pocket Adapter provides a convenient means to quickly swap QuickStream DV/HDV units mounted on a tripod or glidecam

The V-mount Adapter safely sandwiches the QuickStream DV/HDV between the camcorder and an external V-mount battery pack

Specifications	6 Hour QuickStream DV/HDV	9 Hour QuickStream DV/HDV
<b>Model Number</b>	QSDV/HDV-360	QSDV/HDV-540
<b>Disk Capacity</b>	80GB	120GB
